

Renderpro Cornerbead EP

Product Name:

Renderpro Cornerbead EP

Composition:

Unplasticised PVC perforated cornerbead, compliant with the ATT0692 KOMO Certificate.

Colors:

White.

Use:

Finishing beads on outside corners. The legs of this corner bead are flexible and set at an angle of 85 degrees, which allows it to be perpendicular to the base coat mortar. With a narrow visible side of 3 millimetres Type EP0 has no visible side at all.

Particularities:

Do not process if the surface or air temperatures exceed 30°C or if frost is expected.
